INTU FR COLLAR

Intumescent pipe collar

TDS TECHNICAL DATA SHEET

→ PRODUCT DESCRIPTION

The firestop collar **INTU FR COLLAR** is composed of a flexible insert made of graphite-based material and an external casing made of 1,0 mm steel sheet protected against corrosion by a red paint coating. The steel collar casing is equipped with a lock used for strapping the ends and stabilizing it on the pipe, as well as mounting brackets fixing the collar to the partition. The collars ensure fire resistance class up to max EI 240.

→ APPLICATION

The **INTU FR COLLAR** is use for fire protection of penetrations with plastic pipes (PVC, PP, PE, HDPE, PE-RT, PE-X, PP-R/Al/PP-R, PP-R/PP-R-GF/PP-R, PE-RT/Al/PE-RT, PE-X/Al/PE-X) and plastic pipe bundles running through fire partitions.

Flexible walls:

The wall must be minimum thickness 100 mm. Must have frame structure of steel or wooden sections covered on both sides with minimum 2 layers of panels with minimum thickness 12,5 mm.

Rigid walls:

The wall must be minimum thickness 100 mm. Must be made of concrete, reinforced concrete, concrete blocks, cellular concrete, ceramic brick (solid, hollow or lattice) or silicate brick (solid or hollow) with min. density 600 kg/m³.

Rigid floors:

The floor must be minimum thickness 150 mm. Must be made of concrete, reinforced concrete or cellular concrete with minimum density 1700 kg/m³.

→ COMPLIANCE:

- Test standard:
EN 1366-3 / EAD 350454-00-1104
- European Technical Assessment:
ETA 19/0844 of 05/08/2020
- Declaration of Performance:
DoP 2/2019
- Certificate of Constancy of Performance
1488-CPR-0825/W

EPD

→ TRANSPORT AND STORAGE

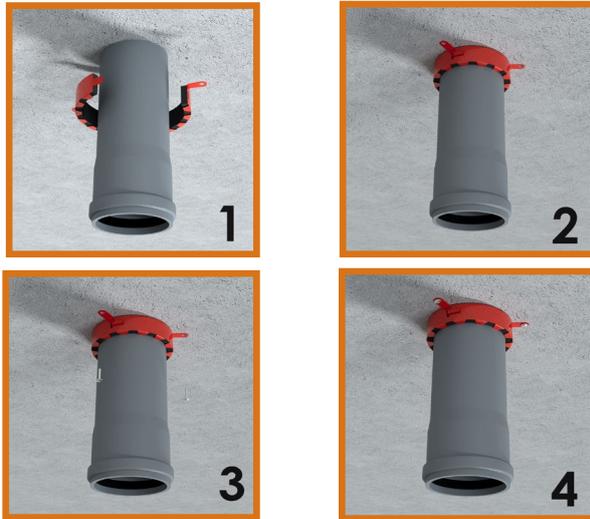

Store in dry and cool conditions;
at a temperature from + 5°C to + 35°C.

INTU FR COLLAR

Intumescent pipe collar

TDS TECHNICAL DATA SHEET

→ INSTALLATION METHOD

Clean the hole and installations from dust, dirt and grease. The gaps between the hole and the edge of the pipe should be filled with mass **INTU FR MASTIC**.

1. Install **INTU FR COLLAR** on the pipe.
2. Secure **INTU FR COLLAR** using the lock.
3. Use steel wedge anchors for installation in the partition.
4. Fill any gaps with mass **INTU FR MASTIC**.
